

Implementing Passion

BeCompany has what it takes to succeed in the most challenging web publishing projects. Our longtime experience spans many state-of-the-art technologies. We apply successful concepts and supply customized solutions based on modular open source components to meet your specific business requirements.

- Strategic concept, including market and technology research for organizations seeking optimal use of web 2.0 (interactive applications)
- Evaluation and assessment of the best solutions by delivering secured, personalized and relevant information and services
- Implementation and integration of proven solutions with high scalability, reliability and flexibility
- Service, training and support tailored to your needs

We are active members in the open source community and have established a knowledge network to benefit our customers.

Our methodology provides you with a less expensive way to come closer to meeting your business objectives. Instead of choosing "buy an expensive off the shelf package" or "build from scratch", you can consider a third solution. Assemble your application from open source components and customize it to meet your unique business needs.
