

Solutions

BeCompany applications are designed to solve critical challenges for departments and enterprises. Branded business and life style services need to be permanently accessible across multiple channels. These solutions must be state-of-the-art and tailored to your business needs to accelerate time-to-value and keep overall operating costs low.

Industries:

- Media and Communication
- Education and Science
- Financial and Insurance

Our extensive knowledge of enterprise architecture enables us to create seamlessly integrated web applications for complex systems. Our expertise includes:

- Web Content Management Solutions (CMS), for instance with Java-based CMS like Apache Lenya or Ruby on Rails based CMS like Radiant
- Document Management Solutions (DMS)
- Enterprise Information Management (interface to ERP)
- Knowledge Management (KM, intranet)
- Corporate Brand Platforms (web2print, print on demand)
